BILATERAL MEETINGS

10:00 a.m. – 12:30 p.m.

14:00 p.m. – 16:00 p.m.

DESCRIPTION RippleBuds is the company which develops and manufactures wired and Bluetooth Ripplebuds that can make the ear hear and speak by using the fact that the voice is coming out of the ear in addition to the mouth and nose. RippleBuds earset makes the clear communications possible in any environment such as the storm, noise, and general situation because Ripplebuds can catch the voice coming out of the ear by putting the microphone in the ear. By comparing the general earset and Ripplebuds earset in a noisy environment, you can see the definite difference. and you can feel the convenience if you try the Ripplebuds which can make you speak and hear only through the ear. Also, you can use Google Voice and iPhone Siri at any time and in any environment because Ripplebuds can block the outside noise perfectly and transfer only the clear voice through communications device. So, Ripplebuds can solve the problem which Google and Apple have and enlarge the communications environment and increase the voice recognition ratio innovatively. In addition to wired and Bluetooth earset, we are developing voice recognition search and control earset, hearing-aid earset, healthcare earset, interpretation earset, smart glass earset with our noise blocking technology which can be our next model. Our vision is to change the paradigm of the earset by making all the people to communicate with others conveniently at any time and in any environment.
